► **OPTIMIZE**  
YOUR SHIPMENTS.

► **REDUCE**  
COSTS.

► **INCREASE**  
TRAFFIC.

Automate your shipping and return process, **reducing costs by up to 50%**

**send** redefines the future of AI driven fully automated self-service shipping and returns tailored to carriers, retailers and ecommerce. Reduce costs, automate shipping and drop-off processes, and take your first and last mile solutions to the next level with a smart, scalable, high-impact solution.

Exponentially improve the customer experience by eliminating wait times, optimizing employee productivity, and achieving balance between administrative and service responsibilities.

Diversify your services and product portfolio with automated self-service logistics services and increase in-store traffic.

Reduce labor costs by automating simple shipping and drop-off services, managing increased transactions without hiring additional staff, and balancing peak hours/seasons.

## Why is **send** the solution for your business? □

**send** not only automates your operation, it transforms and modernizes your customer experience while increasing your profitability.

### Increase Operational Efficiency

Optimize the first mile (shipping and drop-off), reduce costs and increase your staffing efficiency with automated solutions. Allow employees to focus on complex transactions and/or helping customers that need special attention.

### Optimize Sales Floor Space

Increase your average ticket and that of strategic partners with a self-service solution; fast and simple, available 24/7, improving the overall experience while saving resources. Boost revenue per sq. ft. of sales floor space. Improve efficiency in e-commerce returns.

### Automate The Shipping Process

Save costs. Achieve limitless scalability. Automate processes. Simplify operations. Reduce errors. Modernize and invigorate the customer experience and accelerate growth.

**Boost** your sales through innovation and modernization

**Up to 50% less**

in operational costs by reducing overhead dedicated to receiving and shipping packages.

**Up to 80%**

reduction of human errors due to automated weighing, dimensioning and labeling through kiosk.

**70%**

less time employed in shipping/drop-off. **send** takes as little as 1-2 minutes per transaction.

## Key benefits:

□ Increase productivity by redirecting employees to other tasks within the operation.

□ **24/7 Service Capability**

No longer depend on regular hours of operation, 24/7 shipping and drop-off is a possibility
